*"Technologies for generating renewable
carbon-free hydrogen"*

Immediate Release, Monday, September 25th, 2006:

Dr Brian Holcroft Appointed Chief Executive Officer of Hydrogen Solar Ltd

Hydrogen Solar Ltd is pleased to announce the appointment of Dr Brian Holcroft as Chief Executive Officer for the company.

Brian has considerable experience within product development, manufacturing contract research, technology transfer and IP management in start-up and spin-out businesses in a wide field of technologies and markets.

He has an international track record of delivering profitable businesses within bio-instrumentation, wireless communications, chemical and physical sensing, displays, electronics, software, materials and imaging.

Previously Brian was the Technical Director of CRLO Displays, where he raised \$19m for the company's LCD microdisplay development and manufacturing unit, serving military, avionics and consumer display markets.

Before this, he was Managing Director of Central Research Laboratories (CRL), the R&D and innovation facility. There he was responsible for 65 staff with expertise in instrumentation, nano/micro systems, diagnostics, human cell handling, drug discovery instrumentation, gas/chemical sensors, embedded software, audio, multimedia, video, mobile applications and wireless communications technologies. During his period there, Brian turned around the cash negative, loss making R&D function into a cash generative operation.
